

ICEG Public Organisation & Services: Working Group

Welcome!

7th of October 2021

Virtual working group – Microsoft Teams

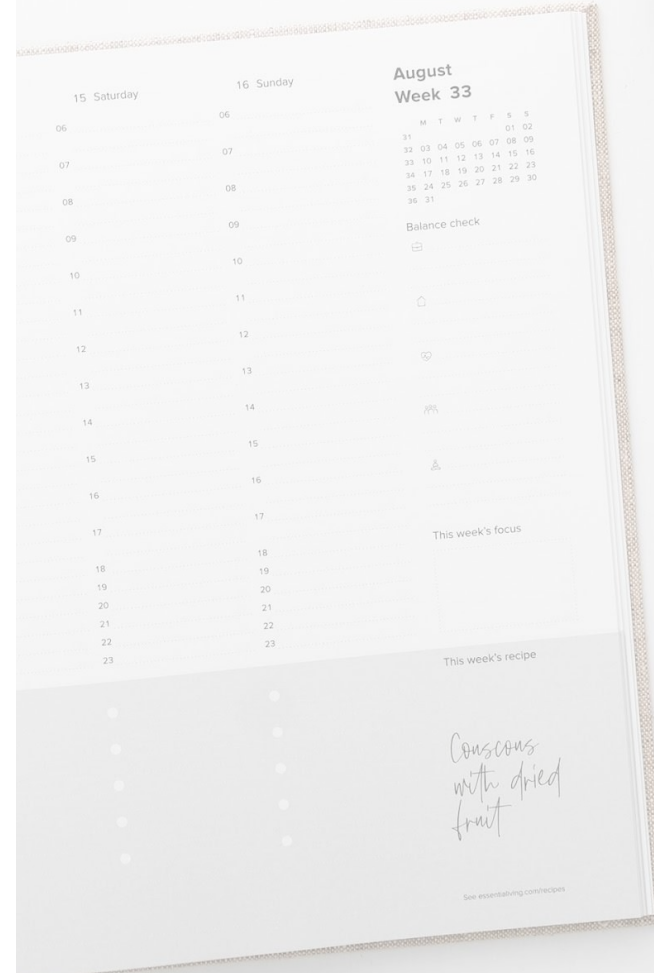

Introduction & meeting objectives 5'

Agenda

1. Welcome and objectives
2. Process, input and timeline
3. Presentation of changes to PO & PS models
4. Public review period / Call for volunteers
5. Closing

We have foreseen a 1-hour webinar

House rules

1. **Mute your microphone** when you don't speak
2. Virtually **raise your hand** to speak
3. Don't hesitate to **raise questions** and contribute via the chat (+1, -1)

The webinar is recorded and can be made available afterwards

Meeting objectives

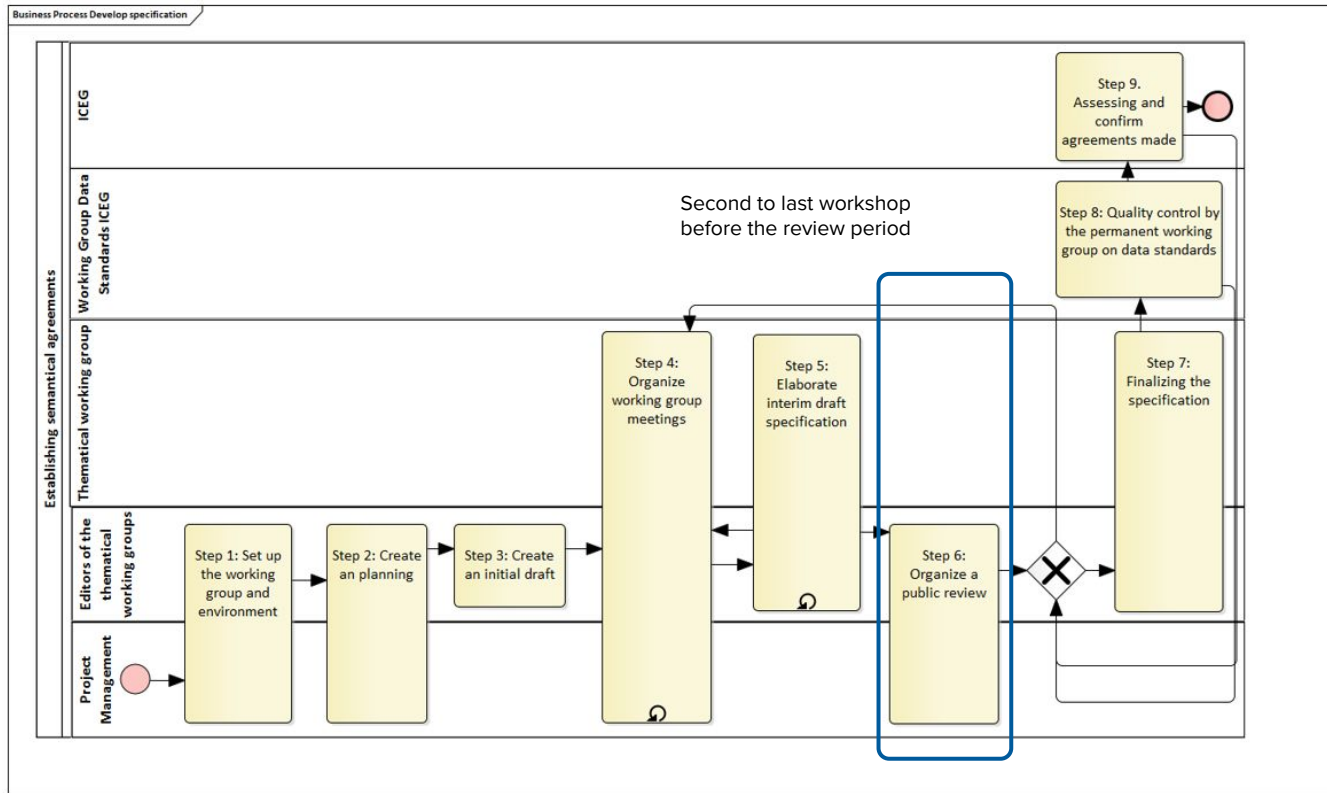

1. Introduce the **stable version** of the PO & PS **models**
2. Plan and organise the **review period**

Process

1. CPSV-AP and CPOV were used as baseline
2. **Workshop #0** as a first iteration to enrich and tailor the models
3. Mapping to NOSTRA and OSLO to further enrich the models
4. **Workshop #1** as a second iteration to update the models (meeting report can be consulted at the following URL <https://github.com/belgif/thematic/tree/master/buildings/Meetings>)
5. Updated specifications using a toolchain
6. **Workshop #2** as a third iteration to collect feedback from the working group on changes made and new use cases (*focus on use cases*)
7. Updated specifications using a toolchain
8. **Workshop #3** as fourth iteration to collect feedback from the working group on changes made (*focus on outstanding issues, cardinalities and definitions*)
9. **Workshop #4** as opportunity for presenting the stable version of the models and kick-start the review period, effective immediately.

How do we achieve this

Public Services 15'

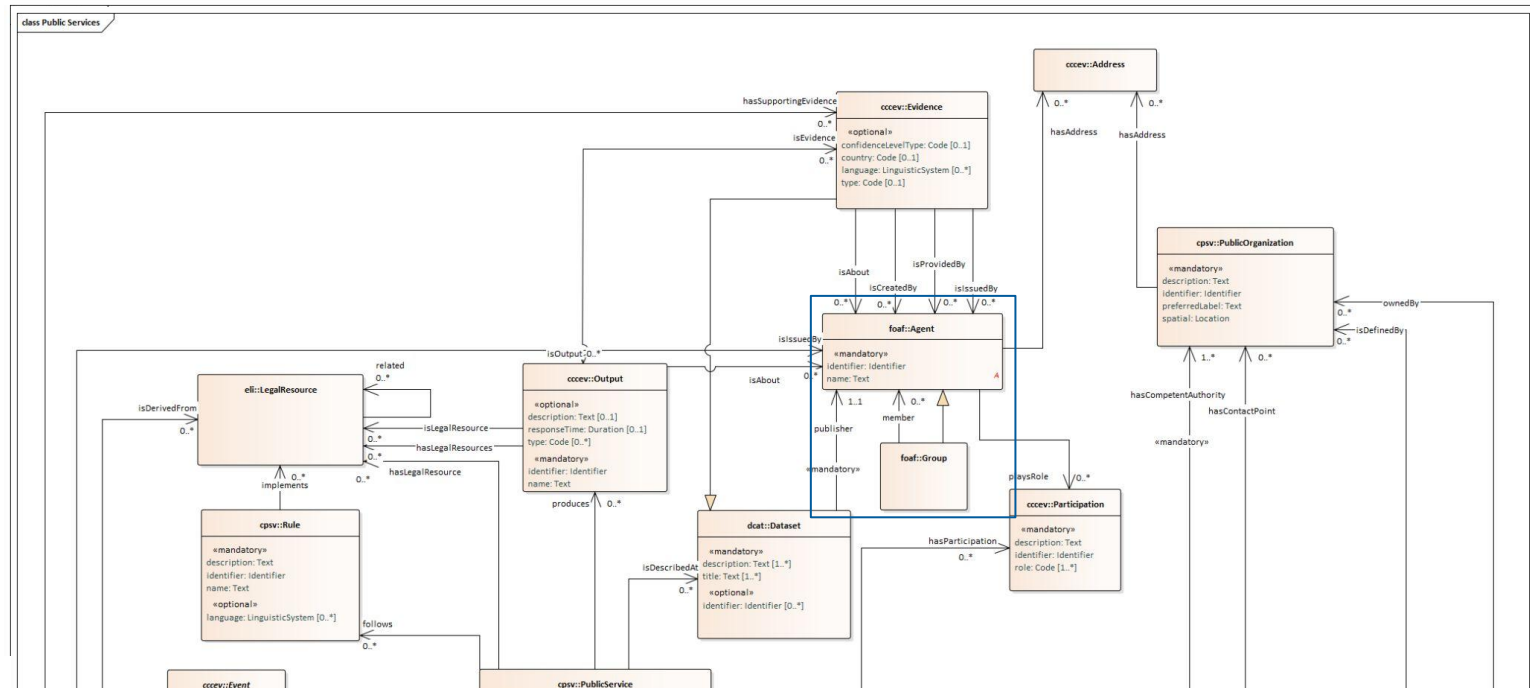

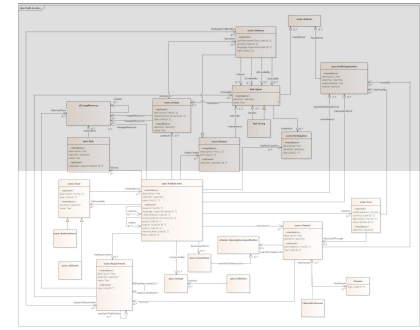

Updated specification

https://belgif.github.io/thematic/models/public%20services/index_en.html

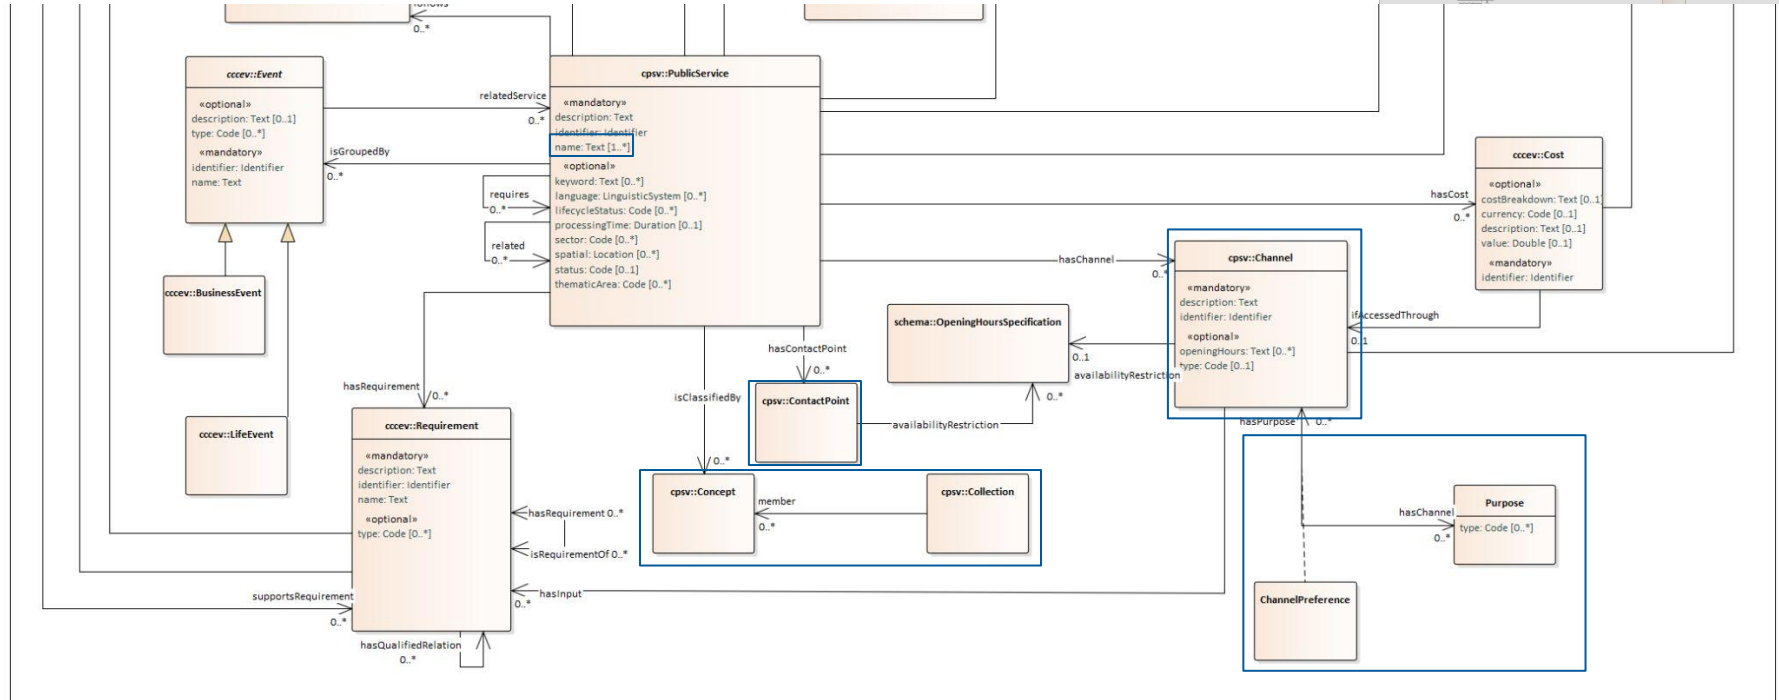

Updated specification

https://belgif.github.io/thematic/models/public%20services/index_en.html

Updated specification

https://belgif.github.io/thematic/models/public%20services/index_en.html

Change request PS

From Webinar #3

- Addition of cardinalities to all classes and attributes
- Addition of descriptions and Usage Note for all remaining classes and attributes
- Changing AgentClass class for Group class
- Remove all subclasses of Channel
- Replace alternativeName of Public Service by unbounded cardinality on name
- Add the purpose of a Channel
- Add Contact Point
- Add classification of Public Services with Concept and Collection classes

From GitHub

- *No new issue nor new comment since last webinar*

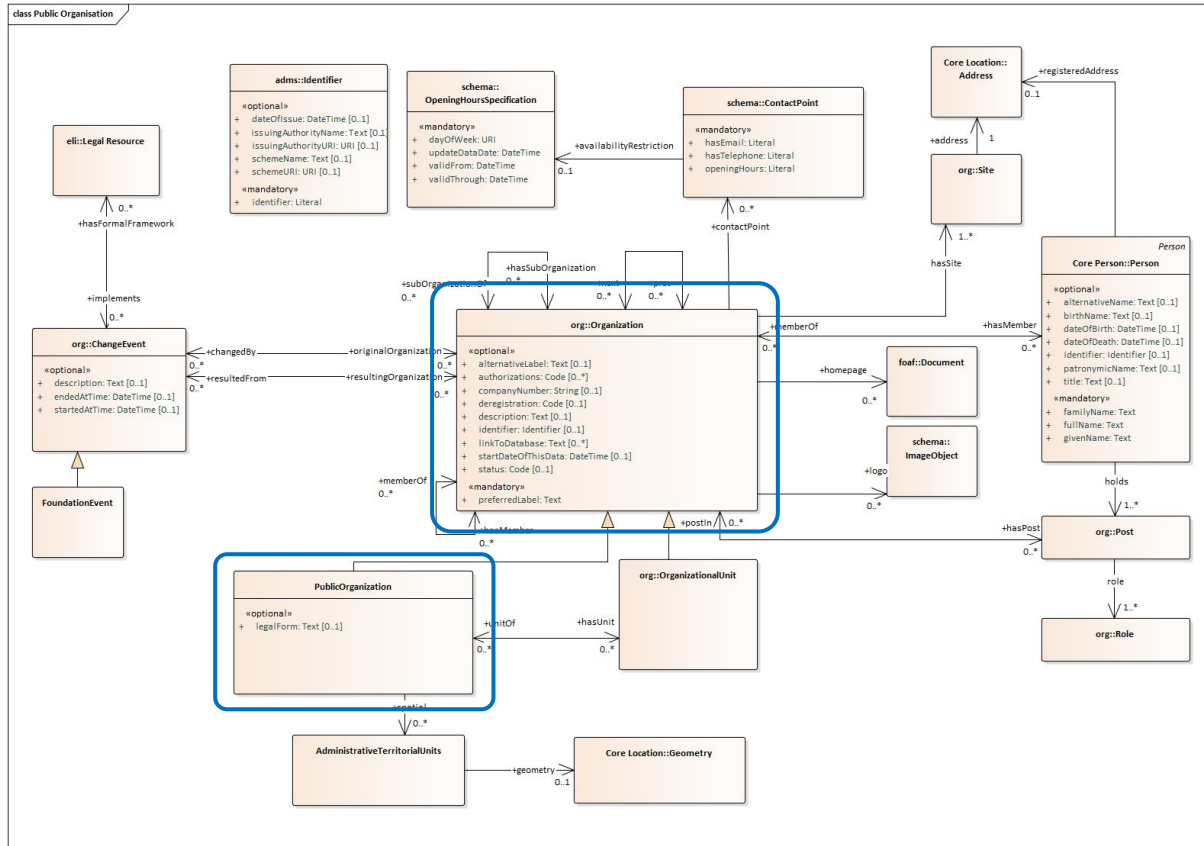

Public Organization 15'

Updated specification

https://belgif.github.io/thematic/models/public%20organisation/index_en.html

Change request PO

From Webinar #3

- Attribute Type has been changed to LegalForm
- preferredLabel and alternativeLabel have been moved to the Organization class
- Addition of the following attributes
 - Company number
 - Status
 - Approvals, authorisations or licences of interest to third parties or subject to publication
 - Ex officio deregistration due to failure to file annual accounts
 - Links to databases for information
 - Start date of this data

From GitHub

- *No new issue nor new comment since last webinar*

Public review period 20'

Outstanding Github issues

[Classification of Public Services](#)

[LifecycleStatus attribute](#)

[Naming conventions](#)

[Classification of the ATU](#)

[Remarks about Public Organization data model](#)

[Remarks about Public Service data model](#)

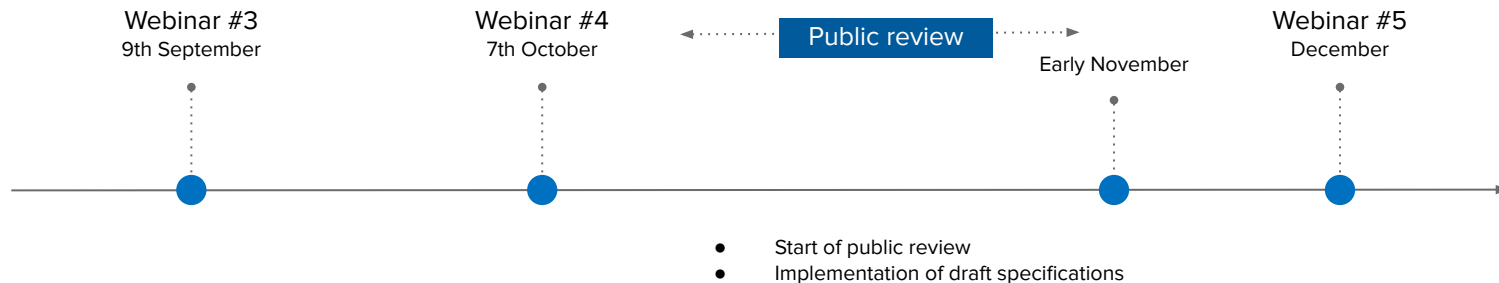

[What is exactly a locator](#)

All issues have yet to be discussed and feedback to be incorporated in the models

Next steps

1. **Call to volunteers:** creation of use cases out of the models, i.e., mapping one (or two) of the models to a life-like situation and then create a serialisation, for instance, in RDF/XML format.
2. **Public Review:** Review specs & provide input on Github page. Deadline of public review will be announced in the next two weeks. ETA expected by mid-November.
3. After public review a **closing webinar** will be organised to summarize this project where we'll also give an account of all the issues logged & resolved during public review

Conclusion & next steps 5'

Feedback & collaboration

Proposals and suggestions for use cases can be sent to the following email addresses:

- barthelemy.florian@pwc.com
- christophe.bahim@pwc.com
- louis.matha@pwc.com

Models can be accessed using the following links:

- [Public Organization](#)
- [Public Service](#)

Issues and comments can be posted on the Thematic GitHub repository

- [GitHub Repository](#)

Thanks!
